

Plant Parts Sorting Cards

Cut out the cards and sort the plant parts.

ROOTS

Anchor the plant in the soil and absorb water and minerals.

STEM

Supports the plant and transports water, nutrients and sugars.

LEAVES

Make food for the plant using sunlight, water and air.

FLOWER

Helps the plant reproduce and make seeds.

FRUIT

Protects the seeds and helps them spread.

SEED

Can grow into a new plant under the right conditions.

BARK

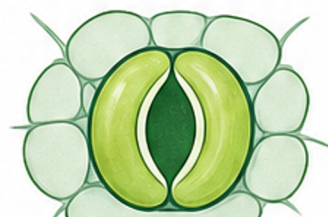

Protects the stem from damage, sun, and disease.

POLLEN

Carries male cells to help flowers make seeds.

GUARD CELLS

Open and close tiny pores to control gas exchange and water loss.
